Professional Experience

Frontend Developer (Project-Based)

Digital Lord | March 2026 – July 2026

Developed a modern multi-page business website for an IT services project using HTML, Tailwind CSS, and JavaScript. Collaborated directly with the project owner to implement business requirements and build responsive user interfaces with interactive navigation, reusable UI components, and optimized user experience across multiple pages.

Frontend Developer

UNIAD (via Digital Lord) | August 2026 – Present

Building the frontend for UNIAD, a study-abroad consultancy platform — currently setting up the core structure and component architecture using Next.js, React, Tailwind CSS, and JavaScript before moving into full page development.

PROJECTS

Task Management Project

Live Link | GitHub Repository

Developed a full-stack freelance task marketplace that enables users to post, browse, and manage tasks securely. Implemented Firebase Authentication, integrated RESTful APIs with Node.js, Express.js, and MongoDB, and built task management features including category selection, deadline management, and featured task listings.

HR NoticeBoard Management System

Live Link | GitHub Repository

Developed a full-stack HR Notice Board Management System for creating, publishing, and managing organizational notices. Implemented dynamic notice status management with Publish and Save as Draft functionality, interactive notice forms, and RESTful API integration using Node.js, Express.js, and MongoDB.

JobTrack – Job & Company Management Platform

Live Link | GitHub Repository

Developed a full-stack job and company management platform with secure Firebase Authentication and dynamic data integration through RESTful APIs. Built interactive user interfaces with protected routes, company and job listings, and seamless navigation using React Router.
